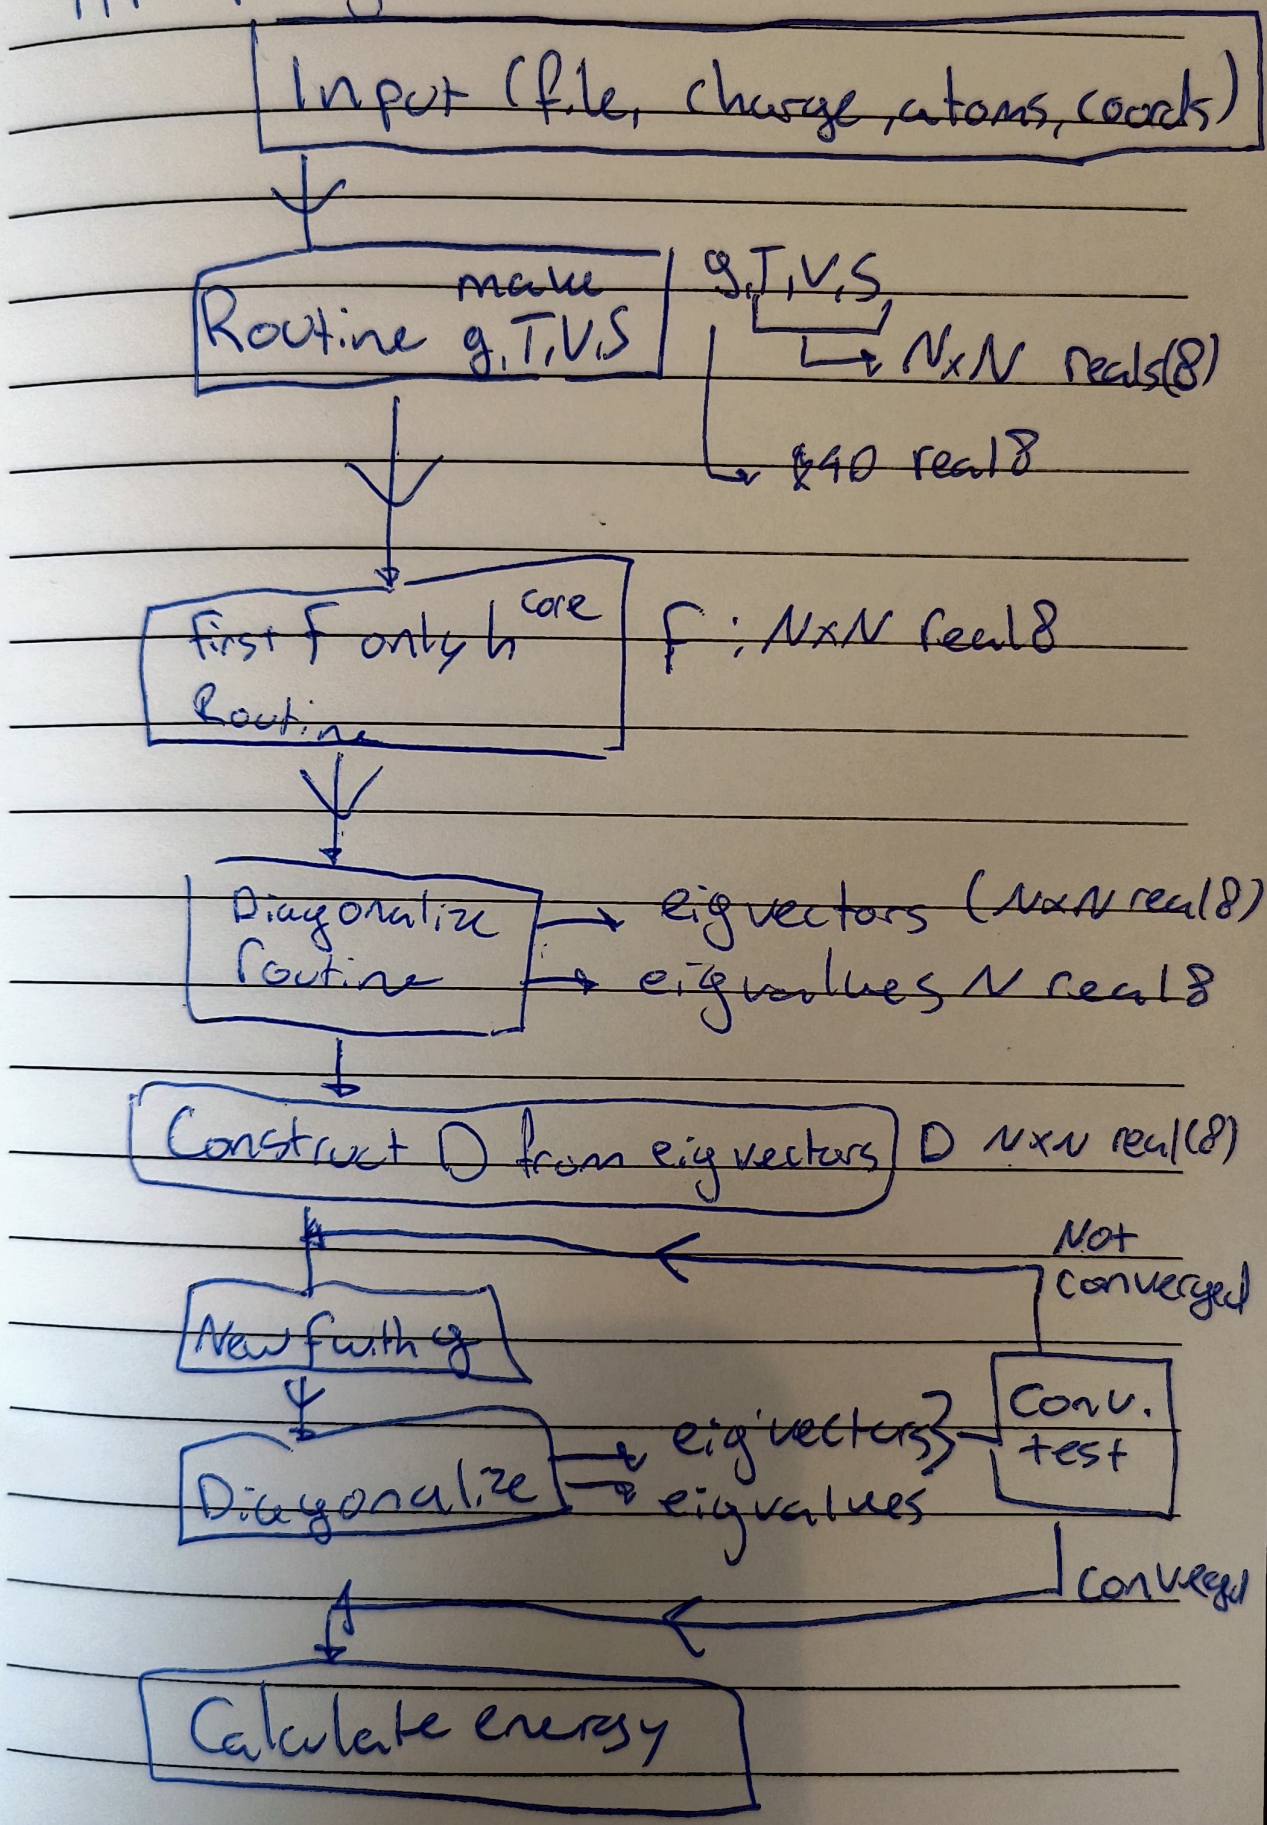
HF Program



Input (file, charge, atoms, coords)
Routine make g, T, V, S
g, T, V, S
N x N reals(8)
~40 real8
First f only h core Routine
f : N x N real8
Diagonalize routine
eigvectors (N x N real8)
eigvalues N real8
Construct D from eigvectors
D N x N real(8)
Not converged
New f with g
Conv. test
Diagonalize
eigvectors
eigvalues
converged
Calculate energy
